## Get Monet for Nothing

*Teddy Quillfeather number three is now available for pre-order.*

Taking refuge from London's mating season, Teddy travels to Paris for a little light smuggling but soon finds herself at the centre of the impossible heist of a priceless masterpiece on its way to auction.

Her friends are under the gavel for forgery, fraud, and filching fine art, but sorting the clues from the counterfeits only gets more surreal as Teddy's seemingly simple smuggling scheme turns into yet another impossible theft, and she must canvas the capricious, suspicious, and radically seditious authors, artists, swindlers, and socialites of the literary Left Bank of 1920s Paris.

*And so I finally have my 1920s Paris number in which I introduce Teddy to the city in which I live and some of the characters, real and imagined, who have lived here too, finding it occasionally impossible to resist teasing Hemingway, Stein, Fitzgerald, Joyce, Beach, and some of the painters and poets and prozers and posers who provided such a textured background to the city and story.*

# The Case of the Missing Eiffel Tower

I feel it very likely that some variation on the joke depicted in this edition's cartoon has been done before and almost certainly done better, but it's included anyway because a) it's all we've got at time of going to press (an excellent reason on its own) and b) it goes some small distance in compensating for the lack of an Eiffel Tower on the cover of Monet for Nothing.

Everyone knows that you can't set a book in Paris and not include a picture of the Eiffel Tower on the cover. And yet, that's exactly what we've done, because a) see point a, and b) the prospect of a paint-by-numbers Monet for a book featuring Monet forgeries was too heavy-handedly hilarious to pass up.

## Death Reports to Audible

*Smashing all records to date and hopefully setting a new standard, the audiobook of Death Reports to a Health Resort is already on Audible.*

Anty's mum sends him to Epping Forest to defend what remains of the family name when his tempestuous Uncle Pim is accused of the impossible murder of the universally disliked taskmaster of a health resort dedicated to the repression and suppression of the best of the seven sins.

Tim Bruce is back beside himself as multiple multi-faceted members of a motley cast, including a basset hound, Anty's mum, and a pie-eyed Vickers singing music hall favourites.
